ABOUT HEARTLIFE

HEARTLIFE INDICATOR PACK OPTIONS

There are three Indicator pack options designed to suit every life situation. For the individual, the individual Pack will give you a 360 degree measurement of your behaviour. To get clear data on the balance of your work and social life, the Work Life Balance Pack allows you to get three people in your work environment to answer the survey on you, then three from your social environment to do the same.

For the leader or person who interacts with groups of people (departments, branches or countries), the Leader Pack gives you feedback from 15 people split into five groups of three. This has proved very useful for Pastors, leaders or board members who want insight, not only into how they are perceived at different levels in their organisation but also by those to whom they relate.

THE INDIVIDUAL PACK

This is the entry-level pack and it allows you to ask three other people to complete the survey on you, giving you one Others Score Indicator. It is best to select one person you report to, one peer and someone who reports to you (or another peer).

Total Respondents: 3

Total Indicators: 3 (Self Score, Benchmark, Others Score)

THE WORK LIFE BALANCE PACK

For an accurate picture of your work/life balance, this pack allows you to ask two different groups of three people to give you feedback, preferably one group from your work and one from your friends or family.

Total Respondents: 6

Total Indicators: 5 (Self Score, Benchmark, Others Score Work, Others Score Social and Others Score Total)

THE LEADER PACK

This pack is for the leader who interacts with numerous groups of people on a regular basis. This could be their direct reports, people they report to, their peer groups, customers or suppliers. This allows them to ask five groups of three people for comprehensive insight.

Total Respondents: 15

Total Indicators: 8 (Self Score, Benchmark, Others Score Group 1, Others Score Group 2, Others Score Group 3, Others Score Group 4, Others Score Group 5 and Others Score Total)
